

Happy New Year 2026 !

In te sense of life

In 2026, I wish for each of you to go towards the sense of life, the one that vibrates, that connects and that honors it.

With *No Limit*, an installation created as part of *Jardiner* exhibition at the Cité des sciences et de l'industrie in Paris, I wanted to overturn our certainties: walking with our heads on the grass, feeling the ground on the ceiling, and discover a beauty in the reflections of a garden whose limits are erased by the effect of mirrors.

This inverted landscape is an allegory of our persistent illusions: believing in the infinity of resources, forgetting the boundaries of life, sometimes losing our sense of reality.

Going in the sense of life is following the right path, listening to your creative intuition, and finding your inner direction which connects to others, to the Earth, to the breath of the world.

May this year 2026 be an invitation to create, to love, to feel; to walk together, in the sense of life.

Exposition : No Limit

To learn more about the immersive installation *No Limit*, to be seen until July 12, 2026 at the Cité des Sciences et de l'industrie in Paris in the exhibition *Jardiner*, click on the link below.

L'Agence Tricoire Design

Precursor of design for nature since 2006, Alexis Tricoire places the living at the heart of our daily universe. His creative approach within his design agency aims to strengthen the link between city dwellers and nature.

Through the creation of indoor and outdoor furniture and artistic installations, it allows the implantation of plants in collective spaces while raising public awareness about biodiversity preservation.

Thanks !

TRICOIRE
